Repair Work

Devil's Slide (post mile 39.14)

- Crews continued to install the debris fence today. Work conditions are relatively difficult due to the steepness of the cliff below the road. Each worker is attached to a safety line secured to a concrete barrier on top of the cliff.
- A maintenance crew inspected underground drains using a video camera. There were no reports of significant damage due to slide movement.

Slide at Post Mile 40

- Fiber rolls and erosion control netting and was installed on the re-built embankment below the road.
- A trench along the south bound shoulder was excavated for a PG&E power line.

Traffic

- The effect of limiting right turns for Highway 1 north bound traffic onto east bound 92 will be evaluated to determine if backups are reduced at the intersection of Highways 1 and 92.
- Park and Ride signs have been received from the City of Half Moon Bay. Installation at Pillar Point Harbor is scheduled for Wednesday.
